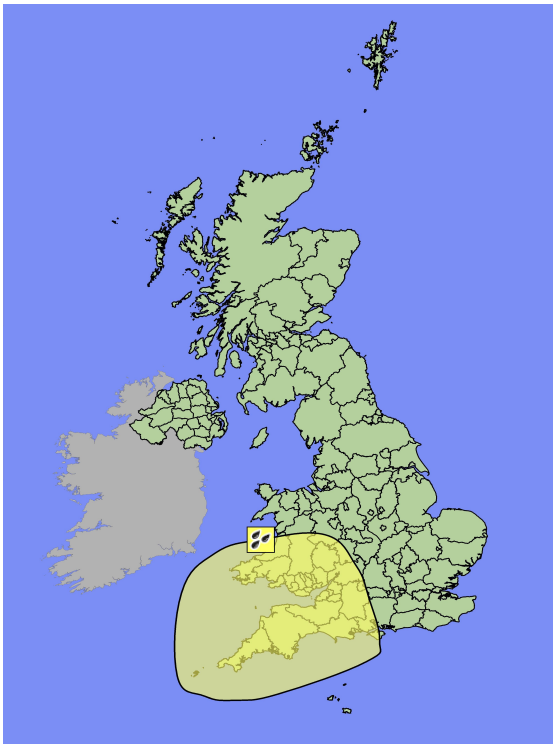
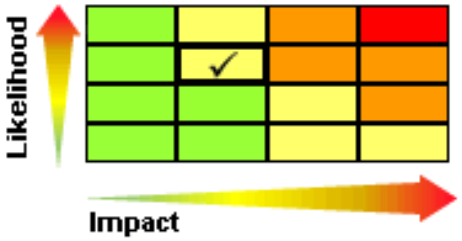
National Severe Weather Warning Service





Chief Forecasters Assessment
Wednesday?s, potentially deep, depression will remain slow moving over or near to Ireland during Thursday slowly losing its intensity through the day. However scattered heavy showers are expected over parts of south Wales and southwest England. With the ground already saturated from the previous wet weather the heaviest of the showers will bring a risk of localised flooding.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **00:05 on Thu, 18th Oct 2012** until **23:59 on Thu, 18th Oct 2012**

The ground remains saturated, and with the threat of further heavy rain, the public are advised to be aware that localised flooding and disruption to travel remains a risk on Thursday.
